For these reasons, a dependable supply of fresh, clean water is attractive to most birds. In fact, a birdbath will even bring to your yard birds that don’t eat seeds and wouldn’t visit your feeders. Providing water for birds can also improve the quality of your backyard bird habitat and should provide you with a fantastic opportunity to observe bird behavior.

**What’s Wrong with a Good Old-fashioned Birdbath?**

Say “birdbath,” and most people think of a concrete basin mounted on a pedestal, the kind often sold in lawn and garden shops. Though these baths make nice lawn ornaments, they aren’t the best setup for most birds. For one thing, they’re often too deep. A good birdbath mimics shallow puddles, which are nature’s birdbaths. Concrete baths are also hard to clean; the tiny nooks and crevices must be scrubbed extra hard to dislodge algae and sediment. And finally, concrete basins often crack if they freeze during winter.

**Find a Better Birdbath**

When you’re choosing a birdbath, look for one with a basin that you can clean easily. It should also have a gentle slope to allow birds to wade into the water. You can make your own bath out of a garbage can lid, a saucer-type snow sled, or even an old frying pan. But if you’d rather buy one, look for a birdbath made of tough plastic that won’t break if the water freezes or if your dog knocks it over.

For the ultimate birdbath, set up a permanent pool in your backyard. Just dig a shallow hole in the ground and line it with plastic or cement to make it watertight. Plant ferns and other native plants around the pool to make it more attractive. You can add a pump to circulate the water if you want to create elaborate multi-level pools.

**Setting Up a Birdbath**

Try to imitate a natural puddle as much as possible when you’re installing your birdbath. Birds seem to prefer baths that are at ground level, but if you are concerned about
Keeping the Water from Freezing

Immersion-style water heaters have improved greatly in the last few years, and they’re perfect for keeping the water from freezing in a birdbath. More important, they’re safe to operate. The latest immersion heaters turn off if the water in the bath dries up. Put your heater on a ground-fault interrupted circuit (available from any hardware or electrical supply store) to eliminate the danger of electrical shock. These heaters cost pennies a day to operate and they’re available at most places where bird feeders are sold. A homemade solution is to put a light bulb in a flower pot and place the water basin on top. The light bulb will provide more than enough heat to keep the water from freezing. Though some people advocate adding glycerin to a birdbath to act as an antifreeze, we do not recommend it. You must use a high concentration of glycerin to prevent water from freezing. (To lower the freezing point to 15 degrees Fahrenheit, for example, you’d need to use a 30 percent glycerin solution.) Glycerin is a low-level toxin and has a sweet taste. Ingesting large amounts of glycerin elevates the blood sugar level of a bird, which can be harmful or even fatal. And if a bird bathes in a glycerin solution, its feathers may become matted. Birds bath and preen to enhance the insulation value of their feathers. Matted feathers are poor insulators, leaving a bird susceptible to cold temperatures. So use an immersion heater instead.

Maintaining a Birdbath

The key to attracting a large number of birds is to keep your bath full of water at all times. In the natural environment, most sources of shallow water are intermittent. Although puddles form after a hard rain, reliable pools are rare and birds will travel great distances to visit them. Keep your birdbath full and you’ll be well rewarded. But remember to clean your birdbath every couple of days. Don’t let the water become stale; clean off the bottom of the bath immediately if green algae starts to form. Remember: if you’re trying to make your backyard a better place for birdlife, few things are more attractive than a well-maintained birdbath. Just add water and watch the fun.
