

Stay or Go Cards, page 1

As you migrate to the breeding grounds, a storm rolls in and pushes you off course.

Lose one token

You live in the same place all year so you don't have to deal with the hazards of migration.

A tropical snake climbs a vine and eats your eggs.

Lose one token

The temperature drops below freezing for several nights in a row—brrrr!

Lose one token

Your favorite tropical fruit tree bears fruit right on schedule—yum!

Get one token

You are too weak from lack of food to fly across the Gulf of Mexico to your breeding grounds.

Lose one token

Thanks to strong tail winds, you've migrated to your breeding grounds in time to secure a good territory.

Get one token

Heavy snowstorms cover berry bushes, making it hard to find food.

Stay or Go Cards, page 2

There is a lot of competition for food in your tropical home. You can only raise two nestlings.

Lose one token

Lots of yummy insects hatch and swarm in a temperate forest in the summer.

Get one token

While migrating south to your wintering grounds, you hit a cell tower and are badly injured.

Lose one token

Your rainforest is cleared for pasture.

Lose one token

You feed on abundant insects in a migration stopover in May.

Get one token

Where you live, it's warm almost every day. It never gets below freezing.

Get one token

You store seeds in "secret spots" to eat during the long cold winter.

Get one token

A housing development in Ohio clears your forested hillside.
